IMMERSIVE VR JOGET :

An Interactive Journey into Malaysian Dance Heritage

Challenges in Traditional Dance Education

- Limited Availability of Skilled Instructors
- Declining Interest Among Younger Generations
- Geographical Barriers / Physical Teaching Constraints (Restrictive due to location, availability, and cost)

Level Design / Unique Contribution**Level 1**

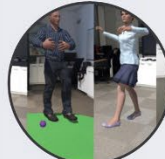

Traditional Attire Learning

Level 2

Dance Learning

Level 3

Occasion Learning

	2D Image Display (Hard to grasp complex movements)	2D Perspective Video Learning (Non-immersive)	NPC visualization within the field of view and lack of Contextual Depth
Traditional Learning Methods	 Dance Training with Image Display	 YouTube Applied to Dance Learning	 Learning Folk Dances Using Mobile Augmented Reality
Immersive VR Joget	360-Degree Dance View  Offering a fully immersive 360-degree perspective of the dance	Gamified Learning Experience  Following on-screen music notes and a NPC to learn Joget	Comprehensive Cultural Education  Educating users on traditional attire and the cultural context of Joget

Application Design**Features & Benefits****Usability Evaluation**

- ▶ System Usability Scale (SUS) (Conducted with 32 Participants)

- ▶ **Average SUS Score 84.14%**

The 84.14% score indicates this application is highly usable, reflecting strong user satisfaction and effective design.

Technology Readiness Level

- ▶ TRL 3 (Proof of Concept)

Potential Collaborators

- ▶ Collaboration with Cultural Institutions (Partnerships with museums, and government bodies)
- ▶ Educational Partnerships (Universities and schools, integration into curricula)
