FOREWORD

In a world defined by constant transformation, the creative mind does not merely adapt—it reverberates. It listens deeply, responds thoughtfully, and amplifies change through design, sound, movement, and story. UNLOCK 2025: Reverberate is a celebration of this resonance—a showcase of the Faculty of Creative Multimedia's final-year projects that pulse with the energy of new ideas, shaped by diverse voices and the distinct disciplines within our walls.

From the compelling narratives of Animation and Visual Effects, to the sharp messaging of Advertising Design and Creative Multimedia, the immersive experiences crafted in Virtual Reality, Interface Design and Media Arts, and the sonic storytelling of Creative Audio—each work in this exhibition sends out a wave. These waves, born from long hours of experimentation, critique, and reflection, ripple outward into industries, communities, and futures yet to be imagined.

Reverberation is more than echo—it is the continued presence of impact. It is the response to inspiration, the consequence of collaboration, and the signature of authenticity. Our students' works embody this spirit, shaped by their academic journey and carried forward by their intent to engage, disrupt, and elevate.

Through this exhibition of our work, the audience will encounter futures in formation: visual, tactile, interactive, and emotional futures. These are not just projects; they are evidence of creative momentum—frequencies of a generation ready to contribute to a larger, evolving cultural dialogue.

On behalf of the Faculty of Creative Multimedia, I invite you to experience UNLOCK 2025: Reverberate not only as an exhibition, but as an open signal—one that welcomes interpretation, inspires imagination, and continues to echo long after you leave.

NADIA BINTI MAHMUD
Dean, Faculty of Creative Multimedia,
Multimedia University.

by the Editorial & Curatorial Team

REVERBERATE was chosen not simply as a theme, but as a lens—one that highlights how creative media transcends its point of origin. In every medium explored within this book—whether visual, sonic, spatial, interactive, or hybrid—there is a shared sensibility: a desire to make work that resonates beyond the screen, the studio, or the moment of making.

This curation brings together the diverse disciplines within the Faculty of Creative Multimedia, yet treats them not as isolated categories but as interwoven voices. Each student project has been selected not only for its aesthetic and technical merit, but also for its ability to provoke, connect, or linger—works that reverberate with relevance, emotion, or innovation.

• The structure of the book reflects a journey: from foundational explorations to advanced conceptual executions, from individual narratives to collaborative systems.

Every section introduces a distinct creative language, but they are all unified by a common pulse — the echo of intention meeting execution, of creative impulse becoming immersive experience. •

TS. DENDI PERMADI
Programme Coordinator
BMm in Virtual Reality

DR. ANIS HARON

ERWIN ABD JABBAR
Programme Coordinator
Immersive Media Design

Throughout the curation process, we've asked:

What makes a project resonate?

- How does a design speak to its time, its audience, or its medium?
- Where does the work travel once it leaves the hands of its maker?

REVERBERATE is a response to these questions. It is an archive of echoes—some loud, some subtle, all meaningful.

This collection is not a conclusion, but a signal outward. We hope it inspires you to listen closer, look deeper, and feel the reverberations still unfolding.

Thematic Interpretation

UNLOCK:REVERBERATE

UNLOCK 2025 is an archive on celebration of creative and traces. It features projects that don't end when the work is showcased. Instead, they continue to ripple across screens, spaces, and conversations.

As part of a faculty that champions cross-disciplinary innovation, experimentation, and storytelling, we believe that the most meaningful works are those that resonate long after they are made.

This showcase is a testament to that belief—a collection of ideas that echo the voice, intent, and vision of each creator.

In the realm of creative media, nothing exists in isolation. Ideas persist, evolve, and ripple outward — echoing across time, disciplines, and perception.

Creative work does not end at the moment of creation. It pulses, expands, and resonates — through space, imagination, and experience.

Reverberate speaks to this enduring energy.

- A sketch becomes motion.
- A sound transforms into space.
- An idea unfolds into an experience that lingers beyond the screen.

This is a celebration of resonance —where form meets feeling, and expression travels beyond its origin.

To create is to reverberate. To leave a mark that moves, shifts, and inspires what is yet to come.

Unlocking the Creative Practice

What does it mean to unlock creativity? In the context of creative multimedia, it begins with curiosity and evolves through iteration, collaboration, and technological fluency. At the Faculty of Creative Multimedia, unlocking creative practice means cultivating not only technical skill but also conceptual depth, cultural awareness, and expressive clarity.

This section offers a visual and narrative glimpse into that unfolding journey—from the foundational sketches to the final render, from ideation to user testing, from isolated moments of making to works that reverberate through broader contexts.

— Timeline of Process

Here, we trace the creative rhythm that defines the culture at FCM. You'll see fragments of sketchbooks, interface maps, animatics, mood boards, media tests, and design iterations—each capturing a moment in a longer cycle of exploration and refinement. This is not just a behind-the-scenes look; it's an invitation to witness how students shape, shift, and evolve their practice across time.

— Insights into Creative Multimedia Culture

FCM is a vibrant, interdisciplinary space where motion, code, sound, story, visual communication, and interaction intersect.

The culture is one of experimentation—fueled by emerging technologies, critical inquiry, and a drive to create meaningful experiences.

Within studios and labs, classrooms and critiques, ideas are challenged and stretched. Mentorship, peer feedback, and project-based learning form the backbone of this culture, allowing students to find their voice while responding to real-world dynamics and media futures.

To unlock creative practice is to release the potential within—to let it resonate, ripple, and reinvent itself across forms and platforms.

That's the essence of REVERBERATE.

The Project Brief

Virtual Reality final student projects this year explore cultural preservation, education, and social connection. The eight Immersive Virtual Reality (VR) experiences developed by student projects are diverse in subject matter; however, they share a common goal: to bridge tradition with innovation, and human experience with digital transformation. From traditional Wau games to drone training and metaverse university, these experiences showcase how virtual reality can bridge the past and the future. Each project transforms learning and storytelling into interactive journeys, empowering users to engage deeply with heritage, history, and identity through cutting-edge digital innovation.

Industry Panels

Experiential Design Team

JAGUH KAMPUNG

A Gamified Virtual Reality Experience Preserving Malaysia's Wau Heritage

Jaguh Kampung is an immersive virtual reality (VR) application introduced to safeguard Malaysia's traditional Wau heritage. In the current world of rapid globalization, traditional games such as Wau are at risk of being forgotten with the growing popularity of digital entertainment. With that purpose, Jaguh Kampung was developed as the first fully immersive VR simulation to preserve and promote Wau through interactive gameplay enhanced with AI-integrated conversational NPC.

Developed with the Unity engine, Autodesk Maya, and Adobe Substance Painter, the VR application blends authentic cultural storytelling delivered by non-playable characters with a physics-based kite-aerodynamics model, coupled with constructivist learning principles, to provide learners with an outdoor interactive and gamified Wau crafting and flying experience within a Malaysian village environment. The project is in collaboration with the Jabatan Kebudayaan dan Kesenian Negara (JKKN) and local Wau artisans certified by Majlis Pelayang Malaysia to ensure authentic representation of traditional Wau. Jaguh Kampung can be easily deployed in rural schools, museums, or tourism venues and is scalable to expand to other traditional games.

APA TU? KUEH MUEH

A VR Cooking Game

Apatu Kueh Mueh is an immersive Virtual Reality (VR) application developed by Portoi Production with the aim of preserving and reviving interest in Malaysia's traditional kuih-muih (desserts), particularly among the younger generation aged 19 to 28. The project was created in response to the declining knowledge and appreciation of traditional desserts due to globalization and the rising popularity of fast food, which has distanced many youths from their culinary heritage.

The application uses VR technology to create an interactive and culturally rich environment where users can learn the process of making traditional Malaysian kuih, specifically Kuih Sopang through hands-on gameplay and engaging narratives. Set in a realistic traditional Malay kampung kitchen and vibrant pasar malam (night market), players are guided by an NPC character named Cik Kuih, who uses local Negeri Sembilan dialects and storytelling to instruct users through each cooking stage.

The application features multiple gameplay tasks such as gathering ingredients, stirring, pouring, kneading dough using gesture controls, and steaming the kuih—all designed to simulate real-life cooking while maintaining cultural authenticity. Developed using Unity 3D, Autodesk Maya, Adobe Substance Painter, and animated through Mixamo, the project emphasizes both educational value and emotional engagement by integrating 3D models based on real-life traditional tools, local attire (like Baju Kebaya Setengah Tiang), and culturally inspired music and sound effects.

PATTERN OF PROGRESS: LEGACY

Industrial heritage from the 1800s shipyards like Boustead & Co., often fail to visually engage with current audiences because traditional teaching methods cannot relate with historical events. Current history education methods are too static, thus making it difficult for people to understand and remember important industrial heritage stories from Singapore's two century old history. This VR application aims to create an immersive and interactive experience that helps users connect emotionally with Boustead & Co.'s 1800s shipyard history while improving their memory retention of historical facts.

The software used for development includes Unity 3D game engine and Blender for 3D modelling to create historically accurate environments including shipyards, markets, and shophouses from the 1800s. Next, the team conducted usability testing with 15 participants using the System Usability Scale (SUS) to measure user engagement, ease of use, and overall satisfaction. Finally, both quantitative data and qualitative feedback were collected to evaluate the application's effectiveness. The team successfully developed a complete VR application featuring interactive NPCs, quest systems, and historically accurate 3D environments that recreate Boustead & Co.'s shipyard operations.

VIRTUAL REALITY | INFINITEREALMS

The environment is a lively 19th-century coastal trading port inspired by early colonial Singapore, featuring tightly packed two-story shophouses with terracotta roofs, wooden piers lined with cargo, and bustling market activity along the waterfront. Wooden boats dock at the jetties as merchants and townsfolk trade goods, while carts, barrels, and canopies bring the scene to life with historical authenticity. Surrounded by lush greenery, palm trees, and distant farmlands, this setting captures the vibrant rhythm of a growing port town and serves as an immersive, explorable hub where players experience the cultural and economic heart of the era.

INCISION VR: PRECISION IN PRACTICE

Immersive VR Trainer : Incision and Drainage Procedure

This research presents the design and development of an immersive Virtual Reality (VR) trainer for the Incision and Drainage (I&D) procedure, with the goal of enhancing clinical confidence and procedural competency among medical students. The simulation incorporates multimodal guidance to support active learning through interactive cues, step-by-step 3D animated instructions, voiceovers, and visual prompts.

A flashcard-style quiz is embedded to reinforce users' understanding of the instruments required at each procedural step. An accuracy-based assessment module evaluates the user's ability to perform the I&D procedure in the correct sequence without guidance. To simulate clinical diversity and encourage critical thinking, the simulation features multiple virtual patients with varied wound conditions and abscess locations.

Additionally, an AI-powered inquiry-based learning feature was integrated using the DeepSeek API to enable conversational interaction. Users can engage in live chat with Dr. Nurin, a non-playable character (NPC), to ask contextual or curiosity-driven questions related to the I&D procedure. The usability of the simulation was evaluated using the System Usability Scale (SUS) with 30 participants.

DESIGN BOARD

Precision In Practice

INCISION

IMMERSIVE VR TRAINER FOR INCISION AND DRAINAGE PROCEDURE

ENVIRONMENT DESIGN

Clinic Hall (Waiting Area)

Clinic treatment Room

Set in a realistic Malaysian clinic, the player begins in the waiting area and proceeds to the treatment room for both the **tutorial** and **assessment** stages. The environment was modeled using real-world references and sketches to support immersion and clinical accuracy.

ASSETS DESIGN

A tray of 3D-modelled core surgical instruments used in the I&D procedure simulation. Each asset was designed for visual clarity, recognisability and accurate to scale in VR.

On the tray includes:

1. Antiseptic
2. Sterile gauze pads
3. Forceps
4. Syringe filled with anaesthesia
5. 11-blade Scalpel
6. Hemostat
7. Irrigation syringe
8. Packing gauze
9. Dressing

The tools are fully interactive within the environment and simulation. The player will use them to perform the procedure step-by-step. The suitable materials and shading were chosen to mimic **metal, plastic,** and **fabric** textures for realism and immersion in VR.

UI DESIGN

Precision In Practice

INCISION

Myriad Pro was chosen for its clean, modern and highly legible appearance, making it ideal for a medical training application. The sans-serif design communicates professionalism and clarity, aligning with the clinical and instructional tone of the simulation.

The colours from **blue to grey** in the title represents clinical clarity and progression, while also serving as the core colour palette for the simulation's UI and environment.

The palette balances trustworthiness and professionalism, reinforcing the medical training context.

Acumin Variable (Bold & Wide Light) is applied throughout the UI for buttons and interface text, offering strong readability and a modern and streamlined appearance suitable for VR.

Community Hall

Field Hospital

CHARACTER DESIGN

NPC Nurse designed to guide the player through the I&D procedure. Wears a professional nurse attire, blending realism with simplified stylisation for clarity in a VR training environment.

NPC volunteer medical worker also designed to guide the player through level 1 in the field hospital. Inspired by the Red Crescent Society, the volunteer worker wears a red vest with a red cross, to enhance realism and support the simulation's field hospital environment.

MUTIARA HILLS VR TOUR

Suriavindren Gunalan

Muhammad Zafri Anuar

Abdul Azim Abdul Manaf

Mutiara Hills VR Tour: An Immersive Virtual Property Experience

The Mutiara Hills VR Tour project is a virtual reality application developed as a final year project to enhance property marketing through immersive digital experiences. Focusing on the Mutiara Hills residential development in Semenyih, the project leverages interactive 3D environments and semi-realistic modeling to showcase both the interior and exterior of the Balau Homes.

The main objective is to provide potential buyers with a realistic sense of space, layout, and community lifestyle, which traditional brochures, videos, and AR-based catalogs cannot offer effectively. Users begin their journey aboard a virtual airship that flies them across the lush landscape of Mutiara Hills. They explore parks, playgrounds, campsites, birdwatching areas, and ultimately enter the homes to view detailed interiors and design elements.

The application reflects six Sustainable Development Goals (SDGs), promoting green living, accessible spaces, and environmental awareness. Interactivity is enhanced with puzzle-solving elements and sign-guided walkthroughs, creating an engaging user experience. The environment includes sound effects, voiceovers, animations, and particle systems to enrich realism.

The project was developed using Unity, combining expertise in 3D modeling, programming, animation, and storytelling. Ultimately, this VR tour offers a future-forward solution for real estate marketing, enabling users to virtually live, grow, and thrive at Mutiara Hills.

VIRTUAL REALITY | INFINITEREALMS

Gameplay Stages

DRONEWORKS :

VR Drone Assembly Training Program

Drones were first conceptualized by Nikola Tesla in 1898 and have since evolved into a wide range of civilian and commercial industries applications such as agriculture, infrastructure, and delivery, with the commercial drone market projected to reach \$84 billion by 2025. This growth is driven by technological advancements, regulatory support, and increasing awareness of drone capabilities.

As such, a cost-efficient, alternative learning model for traditional training methods in drone assembly education named DroneWorks, this immersive virtual reality (VR) application was created in Unity. The development process was assisted with a representative from Meraque Group to provide confidential context necessary to properly integrate and recreate procedures from existing modules. The resulting prototype emulated the process of drone assembly in a virtual, simplified environment, enabling students to practice freely, safely and repeatedly with the assistance of in-application instructional guidance content and without the limitations of physical hardware.

Students were able to test their assembly knowledge by doing assessment mode with no indicators and guidance to assemble the drone. The usability of DroneWorks was done through a System Usability Scale (SUS), with 15 young adults participating in it. The result was an average SUS score of 82.2, with participants finding that the application is easily usable, fast to comprehend and well-integrated.

MMU VERSE:

GO KART EVOLUTION

MMU Verse: Go Kart Evolution is a virtual reality (VR) orientation experience designed to reinvent the way new students at Multimedia University (MMU) explore and understand their campus. Traditional orientation programs such as guided walking tours are often passive, overwhelming, and fail to provide deep engagement or lasting spatial awareness. To address these shortcomings, this project introduces an immersive, gamified alternative that transforms campus orientation into a narrative-driven go-kart racing experience.

This VR application immerses users in a faithful digital reconstruction of MMU Cyberjaya, allowing them to navigate key buildings and landmarks while participating in competitive, goal-oriented gameplay. Guided by an animated mascot, Ebee, players learn about different campus facilities through interactive storytelling, racing challenges, and memory-based tasks. Each completed challenge unlocks digital postcards and in-game tokens, reinforcing spatial memory and key orientation facts.

The application includes three modes: Tutorial Mode teaches users how to drive the kart and use inventory systems; Story Mode walks users through the MMU campus via races and building tours; and Multiplayer Mode allows users to compete in real-time against peers in a gamified educational environment.

VIRTUAL REALITY | INFINITEREALMS

WIFI WARFARE

A multiplayer virtual reality (VR) game that recreates the experience of living in a university hostel, allowing players to interact with objectives, and compete in team-based objectives to improve social connection, engagement, and familiarity in new academic environments.

This project explores how multiplayer VR environments can combat loneliness and foster meaningful connections among new university students. Inspired by the emotional challenges of entering a new academic space, we created a game that simulates a hostel setting where players interact, and compete in team-based tasks. Using immersive design, the game encourages social bonding through shared experiences, offering a playful yet purposeful approach to orientation and adaptation.

MEDIA ARTS

Unlocks > MetaCanvas

Where technology flows
into expressions.

Reveals technology and artistry as a field of experimentation, where sound, image, code, and performance intersect. These works embody hybridity – weaving narrative, interactivity, and emotion into contemporary expressions that challenge, provoke, and reimagine contemporary culture.

Dr. Anis Haron
Programme Coordinator
Supervisor

Dr. Nursuliana Sulaiman
Supervisor

The Project Brief

This year's Media Arts final projects reflect an extraordinary range of explorations into identity, memory, environment, technology, and human connection. From interactive installations that reveal hidden rhythms of life to works confronting ecological crises and digital dependence, the students fuse creativity with critical inquiry. Together, their projects form a collective voice that questions, provokes, and inspires while offering fresh perspectives on the complexities of contemporary existence.

THE SHIP OF THESEUS

Chien Ka Chien

In today's fast-paced world, work often consumes people's lives, leading to postponed meetups, a lack of downtime, and strained personal connections. Many individuals rush through life, trapped in routines, and miss out on meaningful moments. This project aims to address the issue by creating a functional and interactive clock that reminds users to balance their work and personal lives.

TILES

Lee Zhe Yen

Music is not just about creating sounds; it is also full of colors, as different tiles with different tones can represent different hues when played. However, for those who do not admire music, it may be perceived merely as sound with timing. Since the piano is considered the basic instrument of music, they may think of it only as black and white tiles with good rhythm.

(S.M.C.D.R.P)

Muhammad Khuzairi

"Siapa Makan Cili, Dia Rasa Pedas" is a reflection of a society wrapped in hypocrisy and prejudice, where everyone loves to judge but hates being judged. In this artwork, I explore the bitter reality of modern life, where people are blamed, labeled, and punished based on interpretations that are often unfair—though, of course, we Malays don't judge, we just "advise" with a smile.

THE SILENT TREE

Tang E Faye

The idea behind this installation stems from the struggle of wanting to speak, but not always knowing how or where to do so. The tree represents a silent listener—one that holds secrets and never reveals them. The paper cup telephone symbolizes communication, yet instead of hearing your own voice, you hear birdsong.

RHYTHM OF EXISTENCE

Thevi

In "Rhythm of Existence," I aim to express the fragility and beauty of life's rhythms through the interplay of light, shadow, and motion. Inspired by the natural pulse that sustains us, this project makes the unseen visible, transforming an internal beat into an external, visual experience. The white branches serve as a metaphor for life's structure—bare, delicate, and resilient—while the shifting shadows symbolize the ever-changing essence of existence.

IT'S NOT THE END

Hayden Chan Hauyin

This work made me reflect on how short life is and how fleeting time can be. Looking back on my university journey made me appreciate the moments I have shared with friends. The people around me have given me love and support, helping me heal and create a work that embraces the acceptance of death. Working on this project filled me with a sense of dread, much like anticipating the end of something important.

SMART WASTE MANAGEMENT TRASH

Abdalli Kenan

As the creator of the Smart Waste Management Trash, my artistic vision for this project extends beyond mere functionality; it is rooted in the belief that technology can serve as a powerful catalyst for behavioral change and environmental stewardship. The initial inspiration for this interactive recycling bin arose during a village visit in Malaysia, where the pervasive issue of waste management and the underdeveloped state of recycling culture became strikingly apparent.

ZHONG

See Wen Kai

The project, titled "Zhong", is a clock designed to remind people of the importance of maintaining a healthy work-life balance. It emphasizes the separation of work and personal life, encouraging individuals to break free from the cycle of constant work. The design draws inspiration from classic sundials while incorporating modern aesthetics to appeal to contemporary professionals.

BREATHING VOID

Muhammad Alif Hassan

Breathing Void is an interactive sculpture shaped like a pair of lungs, formed from silicone tubes that carry slow streams of black ink. In solitude, the ink pulses in broken rhythms—a quiet mirror of the emotions we suppress and the pain we carry in silence. But when someone approaches, the flow softens and smooths, as if long-hidden feelings are finally allowed to surface. At the center of the lungs rests a still, dark space: a void. It does not move, yet it feels alive.

Kogila Devi M.

Art has the power to reveal what often remains unseen—to provoke, to educate, and to heal. In *Dye-ing Truth*, I confront the environmental harm caused by the fashion industry, particularly the impacts of textile waste and chemical dyeing processes. Through this work, I aim to give voice to discarded materials that silently carry the burden of overconsumption. My creative approach merges material storytelling, sustainability, and interactive technology.

Hoo Shi Cong

This project examines the instability of identity in a world where replication, reflection, and performance have become part of everyday life. It questions whether identity is an authentic, internal truth, or something externally constructed—shaped by social environments, digital representations, and cultural expectations. By creating both physical and digital forms that mimic the human figure, the work challenges the notion of a singular, stable self.

BUAH-TTERY

Ain Zulaikha Amzani

In the future, deeper research into fruit batteries should focus on developing more efficient electrode materials and configurations. This includes exploring a wider range of fruits or plant extracts that could serve as more stable and potent electrolytes. Another promising direction involves integrating fruit battery concepts with other bio-energy harvesting methods.

BLOOMS

Aida Maisarah Malik

In the fast-paced rhythm of the modern world, we often become so consumed by routine that we forget to pause and breathe. Like the idiom “stop and smell the roses,” Blooms is an interactive installation designed as a gentle reminder to slow down. It invites the audience to take a moment for themselves through a simple gesture that may help brighten their day.

MAKING THE INVISIBLE

Aliaa Nabilah Marcus

This artwork aims to transform the unseen into the seen. By detecting electromagnetic fields (EMFs) present in our environment, it reveals the hidden energies that continuously surround us yet remain invisible to the human eye. These EMFs, often overlooked, are a constant presence in our modern, technological world.

STILL, NOT STILL

Amierah A. Zaihan

Still, Not Still is an interactive art installation that revolves around anxiety and the importance of recognizing its presence. It explores the intersection of technology, reflection, and user engagement through a design inspired by the concept of a smart mirror. By merging real-time generative visuals with the viewer's own reflection, the work blurs the boundary between observer and artwork, inviting a deeper sense of presence and participation.

LINGER

Sadthna S. Sathi

Linger is an interactive artwork created with TouchDesigner, designed to immerse audiences in a unique visual experience. At its core, the work captures and reflects the traces of individuals as they walk past the installation, forming an evolving representation of movement, presence, and emotion. By doing so, it transforms everyday spaces into dynamic canvases, where fleeting moments are visually recorded and displayed.

DEFORESTATION

Safiyah Aqilah Zulkarnain

This installation offers a literal depiction of deforestation, employing basic physical components to illustrate the destruction of the world's forests. The sculpture is composed of stacked acrylic boxes. Rising from the top is a tree constructed from actual wood, painted dark brown, with artificial green leaves—representing what remains of the forest, still present but no longer entirely natural. Attached to the trunk is a pair of red 3D lungs, symbolizing the forest as the lungs of the planet.

THE COST OF CONSUMPTION

Soniasri Jagathisan

The inspiration for this project came from observing how effortlessly we consume—swiping cards, clicking “buy now,” and expecting instant gratification—while remaining oblivious to the environmental toll. I wanted to make these hidden consequences tangible, to confront the reality that every purchase is not just a transaction, but also a withdrawal from the planet's limited resources. To achieve this, I created an experience that is immediate and impossible to ignore.

NEURAL AUTOBIOGRAPHY

Theeran Rajamokan

As a multidisciplinary artist working across music, visual design, and digital storytelling, my practice has always been anchored in the personal archive. Each track, poster, or visual acts as a memory capsule — a fragment of time preserved. With Neural Autobiography, I wanted to break open these capsules and ask: what remains when memories are reprocessed by a machine? This project is more than a visual experiment; it is a confrontation with identity in the age of machine vision.

EYE-SO-LATE

Ting Veron

They are still watching. Who? Everyone, everywhere, all the time. Eyes that never blink. Screens that never sleep. You reach for your phone—again. Not sure why. Just a need. A habit. A quiet panic. We scroll, we stare, as the night stretches on. Rest slips further away. You know you'll feel worse tomorrow—more anxious, more depleted—but you still want it. You want to close your eyes, drift into nothingness, but you can't.

SCREEN TIME

Nor Hilman Rasis

This kinetic sculpture explores the unsettling relationship between humans and social media. A rotating sausage is used to scroll through a smartphone—an action that inevitably leads to the sausage being cut. The gesture draws a stark parallel between human fingers and “dead meat,” reduced to lifeless tools of endless consumption.

INVISIBLE CONSUMPTION

Nur Emelia Athifa

This project explores the invisible reality of microplastic pollution and how it subtly enters our bodies through daily interactions with ordinary objects, food, and beverages. The goal was to push the boundaries of visibility and uncover what often goes unnoticed. Invisible Consumption blends scientific documentation with artistic storytelling, using real waste, microscopy, and interactive visuals to reveal how deeply plastic is embedded in our lives.

The Project Brief

This interface design students project explores how intelligent, user-centred systems can transform everyday experiences across mobility, home, and lifestyle contexts. Integrating digital and physical interactions, the project emphasises seamless connectivity, proactive assistance, and intuitive usability, catering to diverse user groups. Their designs focus much towards reducing complexity, enhancing safety and comfort, and promoting sustainable practices while maintaining engaging and interactive experiences due to project direction and principles. The project demonstrates how thoughtful UI/UX design can create secure, efficient, and enjoyable environments through simulations, visualisations, and user feedback. Ultimately, it highlights the power of design solutions, inclusive interfaces to simplify routines, support decision-making, and improve quality of life in practical, innovative, and future-ready ways.

PROBLEM STATEMENT

- Limited Voice Command Functionality: Manually Interact With Screen
- Lack of Personalization for Different Drivers: Mostly General Interface
- Poor Integration with Smartphones: Disconnected Daily Routines
- Lacks Feedback and Motivation: Driving Becomes Routine

INTERFACE DESIGN | SENSORYTOUCH

STORYLINE DEVELOPMENT

The simulation begins at Mutiara Ville with user profile selection. A synced calendar event pops up, voice-command confirmation and the system auto-updates the route to MMU Cyberjaya.

After class, a low fuel alert appears, guiding the driver to the nearest petrol station. The journey continues toward Putra Mosque but is rerouted to Astaka Morocco via voice command. Upon arrival, a gamified drive summary shows distance, fuel used, time, and score—saved to the app and shareable with friends.

VIDEO EDITING PHASE DEVELOPMENT

The video editing phase focused on turning concept into a relatable driving story. Using Adobe After Effects and Premiere Pro, combined real Proton S70 driving footage with animated UI designs designed in Figma to tell a clear story.

The storyline walks through a realistic journey—starting the car, receiving a synced calendar notification, navigating via voice command, and ending with a gamified drive summary.

SUMMARY

This smart in-car interface is built for Malaysian drivers, especially young adults between 18-25 years old.

It introduces voice-controlled interactions, real-time calendar sync, a gamified trip summary and other features designed around Proton's ATLAS OS to promote better driving habits. Through a realistic simulation video, it showcased how the system fits into daily life—making driving smarter, more personal and more enjoyable.

INTRODUCTION

We introduce our vision: redefining the Malaysian driving experience through a unified intelligence — ATLAS OS, that simplifies every interaction, anticipates driver needs, and crafts a responsive driving ecosystem where navigation becomes seamless, safety turns proactive, and ease-of-use feels instinctive.

STORYLINE

We crafted narrative scenarios to realistically demonstrate ATLAS OS in action. These user journeys highlight tangible benefits around our three key pillars as audiences experience them whilst enjoying iconic views through Cyberjaya, Kuala Lumpur, and Putrajaya.

INTERFACE DESIGN | SENSORYTOUCH

KEY FEATURES

ATLAS OS's pivotal features are designed around our three key pillars: intelligent Navigation anticipating routes, proactive Safety monitoring systems, and an intuitive interface ensuring ultimate Ease-of-use for Malaysian drivers.

NAVIGATION

- Set Destination
- Tourist Mode

SAFETY

- Speed Trap Alert
- Blocked Lane Detection
- Pothole Warning
- Highway Speed Limits

EASE-OF-USE

- Traffic Light Duration
- Centralised Payment
- Parking Assistance

CONCEPT DESIGN

We visualised ATLAS OS beyond interfaces, through After Effects, Premiere Pro

and Blender, we crafted holistic experiences where drivers interact with intelligence, a system which acts as an empathetic extension of the driver, anticipating needs and transforming each drive into a secure, fluid experience.

SUMMARY

We conclude by reinforcing our ATLAS OS vision: a future where Navigation, Safety, and Ease-of-use converge seamlessly, creating a fundamentally enhanced and uniquely Malaysian journey. It isn't just about solving issues, but making the good even better; to create a driving experience where foresight meets fluidity.

Introduction

Modern infotainment systems are convenient for drivers who are familiar with them. However, some older drivers find these systems distracting, intrusive, and even dangerous to use while driving. In Malaysia, the number of elderly drivers is growing as the population ages. Many of them still drive regularly for shopping, social visits, and daily errands. Our design features a simple and intuitive interface that supports a safer, more comfortable, and efficient driving experience.

Design Implementations

Our focus on making the infotainment system more streamlined whilst still being usable with good feature implementation posed a unique challenge in coming up with the feature set necessary.

INTERFACE DESIGN | SENSORYTOUCH

Storyboarding

Every group member initially developed their own storyline and as we convened together, the final output is a mix of everybody's ideas in a seamless manner.

Video Editing Development

Due to our final output being an interactive Unity project, it was quite a large task for our team as we do not have much prior experience in the program. The video contains 3D elements done in Blender and UI elements done in After Effects along with general video editing in DaVinci Resolve Final

3D Rendered Minimap

Reminder Pop-Up

Destination: Cafe

Noteable Features

3D Rendered Parking View

Destination: Park

Noteable Features

- Vehicle Proximity Alert System
- Pop-Up & Audio Reminders
- Task Queue Minimal & Clear UI
- Overhead View Parking Camera
- 3D Minimaps

Summary

This project's main 'essential utilities' skew through the lens of an older user highlights the importance of safety, visibility, legibility, and utility in line with the needs of our target audience. The sooner we are able to implement these features whilst maintaining and simplifying the feature set of modern infotainment systems, the potential for more alert and road conscious driving behaviors is not just an unachievable dream anymore.

Introduction

While the design considers female drivers' concerns, ATLAS provides a smart, safe, and user-friendly infotainment system that benefits everyone, regardless of gender.

Key Features

- Vehicle Condition Monitoring
- User Profile
- Blindspot Detection
- 360° Camera
- Auto-Parking System
- Anti-Theft Protection
- Weather Alert & Speed Reminders
- Surroundings Monitoring (FORT Mode)

Storyline Development

The story maps a journey from uncertainty to empowered control, using interface features that anticipate user needs. Storyboards reflect daily use cases: from receiving safety alerts on a rainy day to parking alone at isolated areas.

This car interface approach in automotive design transforms the vehicle into a fortress of confidence and calm. From navigating complex urban environments with family to ensuring peace of mind. This system functions as a nempatetic extension of a driver's instincts, transforming each journey into a secure experience.

Video Editing Development

The editing phase of this project pushed our team to its limits, necessitating the integration of diverse editing software. This approach was crucial for enhancing both the special effects and overall quality of our video output, ensuring a polished and impactful final product.

Summary

This project centers on designing a car interface through the lens of male drivers—prioritizing safety, intuition, and emotional security. Women often approach driving with a heightened sense of caution and multitasking awareness, especially in family or urban environments. This interface integrates empathetic design elements that inform, protect, and reassure. The goal is to foster a sense of confidence and control, turning the car into a space of safety and ease.

Sarah Zulkhairi
Sarahzulkhairi264@gmail.com
www.linkedin.com/in/sarah-zulkhairi

INTRODUCTION

Long family trips place heavy demands on the driver, often the father, who must stay focused while managing distractions, discomfort, and unfamiliar routes. These challenges can lead to fatigue, reducing safety and driving enjoyment.

PROBLEM STATEMENT

- Distraction from Noisy or Disruptive**
 Long-distance drivers often face distractions from backseat drivers or noisy passengers, which increases stress and impairs driving focus.
- Cumulative Mental and Physical Fatigue**
 The combined effects of physical discomfort, mental strain, and family responsibilities contribute to driver fatigue and reduced attentiveness.
- Driver's Limited Enjoyment of the Trip**
 While passengers can rest or enjoy the scenery, drivers are excluded from the leisure aspect of the journey due to the constant need for vigilance.
- Stress from Navigating Unfamiliar**
 Driving through unfamiliar areas increases cognitive load, as the driver must manage navigation, unexpected road conditions, and unfamiliar traffic rules.

DESIGN CONCEPT

EaseDrive's Focus Mode activates key features to support the driver during long-distance family trips. It includes tyre pressure checking before travel, fatigue detection through eye motion analysis, noise cancellation to reduce distractions, obstacle detection for safety, and real-time updates on arrival time and remaining distance.

METHODOLOGY

The survey aimed to understand drivers' habits, preferences, and challenges during long-distance trips, focusing on issues like distractions, comfort, vehicle features, and travel preparation.

USER PERSONA

Encik Zainuddin, a responsible driver in his 50s, prioritizes safety, comfort, and convenience while managing fatigue, distractions, and navigation challenges to ensure a smooth and stress-free journey for his family.

FINAL MOCKUP

ANYWHR: ESCOOTER FOR MULTIMODAL TRANSPORT

Christopher Chong Wu Xian

Introduction

To design a functional and portable e-scooter that enhances urban mobility, offering flexibility and safety for seamless commutes.

Design Concept

ANYWHR is inspired by the compactibility of a folding chair, the modularity of a custom RC car, the easy customization of a race car, and the portability of a backpack bike. These elements shaped its lightweight, portable, and adaptable design for urban commuters.

Design Objective

To provide a compact and foldable design that enhances convenience for urban commutes.

To offer flexibility through interchangeable components that allow users to adapt the scooter's performance to their needs.

To improve rider safety with integrated features that enhance situational awareness and prevent potential hazards.

To ensure effortless travel by creating a lightweight and compliant design suitable for easy transportation and storage.

>ANYWHR<
ANYWHR
ANYWHR
ANYWHR

Design Criteria

Many in Kuala Lumpur struggle to integrate e-scooters with public transport due to unclear regulations, storage issues, and bulkiness. Scooter-sharing programs create clutter and are vandalised. Surveys show most must walk 10-15 minutes to transit, highlighting the need for a more practical solution.

Problem Statement

Many in Kuala Lumpur struggle to integrate e-scooters with public transport due to unclear regulations, storage issues, and bulkiness. Scooter-sharing programs create clutter and are vandalised. Surveys show most must walk 10-15 minutes to transit, highlighting the need for a more practical solution.

INTERFACE DESIGN | SENSORYTOUCH

Fits Right In Your Bag

ANYWHR is engineered for ultimate portability, weighing just 5.5 kg and folding down to fit into a standard backpack.

Instrument Cluster

Two rear sensors warn of approaching vehicles, while the front camera detects potholes and road obstacles. Integrated navigation ensures smooth and efficient route planning for urban commuting.

Modular Upgrade Parts

Upgrade key components for enhanced performance. Swappable parts include larger wheels for better stability, a more powerful motor for increased speed, and extended battery packs for longer range. These upgrades adapt the scooter to different purposes.

Better Safety

ANYWHR's larger, brighter front and rear lights offer better visibility and make it more noticeable to other road users. Integrated blinkers provide clear signaling for safer urban travel.

AQUATECH

Adib Iman Asmadi Yusri
 Adibimn.asmadiyusri@gmail.com
<https://www.linkedin.com/in/adib-iman>

Design Statement

AQUATECH is a smart aquarium system that simplifies fish care using IoT and a mobile app. It offers automated feeding, lighting, and water monitoring with easy QR-based setup. Blending function and style, AQUATECH promotes responsible pet care in a calm, modern way.

Design Criteria

- **Functionality:** Accurate servo motor for feeding.
- **Interface:** Easy-to-use for all ages.
- **Connectivity:** Quick setup via QR scan.
- **Lighting:** RGB lighting with app control.
- **Sensors:** Monitor water quality reliably.

Background Research

A report by Global Market Insight estimates the pet-tech market will surpass USD20 billion by 2028

Design Objectives

- **Automated Feeding & Lighting:**
 Use mobile app integration to control feeding schedules and LED lighting without manual effort.
- **Child-Friendly Interaction:**
 Design a user and child-friendly interface that allows children to participate in aquarium care.
- **Real-Time pH Monitoring:**
 Track water quality continuously through sensors to ensure a healthy environment for fish.
- **Customizable Lighting Effects:**
 Enable RGB lighting control to personalize the tank ambiance and create a desired atmosphere.

TEASENSE

SMART TEMPERATURE CONTROL MUG

Teng Wen Xin
twxeng@gmail.com
www.wenxins-portfolio.webflow.io/
www.linkedin.com/in/tengwenxin/

Design Statement

To design a mug that heats and maintains tea at precise temperatures with smart features.

Design Objective

- To ensure precise temperature control for optimal tea preparation.
- To enhance user convenience with smart, intuitive features.
- To deliver an all-in-one design for brewing, boiling, warming, and temperature management.

Design Criteria

- Temperature Control
- Heat Retention
- Safety lid with leakproof
- Pre-programmed brewing
- Automatic timer for steeping
- LED Display
- Tea strainer inside
- Portable
- Rechargeable

Research Finding

A survey explores the common challenges associated with tea preparation, including:

1. Difficulty in controlling water temperature

2. Over-steeping issues

3. Struggles to maintain drinking temperature

4. Tea leaves escaping into water

5. Measuring tea amount

The Project Brief

'Reimagine the City' is the theme for Advertising Design Project 1 & 2, where final year students designed campaigns for Malaysian city councils. Malaysia's multiracial identity is enriched by distinct state traditions, cuisines, dialects, architecture, and lifestyles. This brief encouraged students to draw from these unique elements to develop a 360° creative campaign, applying their skills to educate and engage both local and international audiences. The project also envisioned future directions for city promotion. Students narrated their city's stories through chosen mediums—audio-visual, website, or exhibition—supported by four complementary mediums to deliver a comprehensive and compelling campaign.

FLOW INTO NEW CHOW KIT

A multi-platform campaign reintroducing Chow Kit as KL's creative, cultural hotspot for a new generation.

Problem Statement

Chow Kit is **often misunderstood** by Gen Z and young urbanites as **outdated, unsafe, and uninviting**. Despite improvements in safety, cleanliness, and culture, this **perception lingers, overshadowing its transformation** into a vibrant, evolving district. The challenge is to **break these stereotypes** and spotlight Chow Kit's hidden gems.

Solution

The campaign uses **digital media and immersive on-ground experiences** to shift how Gen Z, young professionals, and urban families see Chow Kit. By highlighting its street art, trendy cafés, local food, and cultural richness, we aim to **reintroduce Chow Kit as a fresh, exciting destination for the new generation**.

MEH KE MUAR

Ashraff Fitri
ashraff.fitri04@gmail.com
www.behance.net/ashraff_fitri04
www.linkedin.com/in/ashraff-fitri/

Big Idea

There's a Story in Everything, From the History to the Community

Problem Statement

Despite its preservation efforts and special idiosyncrasies, Muar is overshadowed by other historical cities due to lack of promotion and public misconception.

Solution

Other than focusing solely on the historical and cultural aspects of Muar, also highlight on the local community as a selling point. Their stories are just as important as the stories behind historical attractions. This campaign wants to highlight the whole idea of stories on which Muar is built on.

Campaign Summary

Muar is a town built on stories, from its historical virtues to the people. This campaign highlights how those unseen stories shape Muar as it is today, treating both historical stories and community stories as equal.

ADVERTISING DESIGN | ICONICVISIONS

Create Your Muar - Digital Kiosk

At the "Create Your Muar" kiosk, users can play a series of games and quizzes that will build an itinerary for a trip to Muar.

ENVIRONMENTAL BOOTH

A pop up booth can help gain traffic into the campaign. Tactical merchandise will be sold in a vending machine alongside a photobooth and seating area for the visitors.

KEY ART + OVERVIEW

problem statement

Despite being a town that has easy access to public transportation,

there are less foot traffic in Chow Kit as the interesting places in Chow Kit is not promoted well enough.

the big idea

Chow Lu Ke Chow Kit encourages people to come and explore an authentic experience of KL at Chow Kit, without the hassle of traffic.

MICROSITE

An informational website on the campaign and a fun activity for the visitors.

WEBSITE
WALKTHROUGH

PHYSICAL IMC + MERCHANDISE

This medium is the key to the campaign's visibility. Most of the items designed provides a Call-To-Action (CTA) to the campaign's TVC and website.

FULL TVC VIDEO

TVC COMMERCIAL

A live action + 2D animation advertisement promoting the campaign with the website as CTA.

Characters will interact with the real objects in the video

Shadows are implemented in the TVC to make it more realistic.

A short but clear advertisement, can be understood if played in a place without audio.

The aim of the TVC is to build traffic into the website and increase the campaign's visibility to the public eye.

SOCIAL MEDIA MARKETING

This medium will be focused on platforms that are used widely by the target audience, which are Instagram and Twitter.

The curated posts for this campaign is intended to build traffic into the website and build more UGC and engagement on the campaign.

INSTAGRAM ACCOUNT

DIGITAL IMC

Google Ads that will appear using keyword triggers. Some examples include 'commute', 'train', 'traffic', 'Chow Kit' and so on.

DARI NENEK KE CUCU

Bridging Generations Together

Goh Chian Chian (Constance)
constancegohh@gmail.com
www.behance.net/constancegoh
www.linkedin.com/in/constance-goh

PROBLEM STATEMENT

There's a noticeable cultural and generational disconnect in Melaka. Youngsters decline interest in rich cultural heritages while the older generation are hesitant to embrace modernization. This is a gap we want to pull closer.

SOLUTION

To bridge the generational and cultural gap, leveraging on social media and modern technology will help reimagine the city's rich history and identity. Creating a sense of FOMO and excitement for Gen Z and Millennials through interactive and engaging campaigns will help them revisit and re-learn Melaka through a new perspective.

Campaign Masthead

MELAKA

CITY OF
MELAKA

WATATANG MELAKA

Muhammad Nur Iman

WATATANG MELAKA

PROBLEM STATEMENT

Malacca's rich heritage is well-documented, but the vibrant daily lives and evolving lifestyles of its people remain under represented. This human element, where tradition meets modernity, is crucial to showcasing Malacca as a living, dynamic heritage city that connects the past with the present through the people

SOLUTION

The campaign is to reframe the public's perception of Melaka from being viewed solely as a historical city to one that is alive with culture, personality, and everyday vibrance. This is achieved through immersive storytelling, relatable design, and interactive touchpoints that celebrate Melakan lifestyle, highlighting how heritage lives through its people, food, habits, and stories. Through all these elements, the campaign offers a fresh, youthful lens that brings Melaka's living culture into focus.

BIG IDEA

Melaka is more than monuments — it's in the way people live, eat, talk, hangout, and create. Through fresh, relatable storytelling, visuals, and interactions, the campaign invites locals and visitors alike to see Melaka from the inside out.

THE STORY OF MELAKA ISN'T CARVED INTO WALLS,
IT'S LIVED IN THE EVERYDAY THROUGH IT'S PEOPLE.

KEY VISUAL

CAMPAIGN OBJECTIVES

- Revive appreciation for overlooked cultural communities and practices.
- Encourage youth to connect with heritage in modern, creative ways.
- Position Melaka as a vibrant, culturally rich destination beyond its tourist façade

BRAND OVERVIEW

The official city council responsible for the development, preservation, and management of Melaka's urban areas. As a guardian of Melaka's heritage, MBMB works to maintain the city's cultural identity while promoting sustainable growth, tourism, and community engagement.

MARILAH KE RUMAH KITA!

Nur Batrisya

batrisyiakamarulazlin@gmail.com

www.behance.net/batrisyiaazlin1

www.linkedin.com/in/batrisyia-azlin

Rumah Kita is a festival that celebrates hidden heritage, local culture, and the feeling of "home" through art, community activities, and interactive experiences.

PROBLEM STATEMENT

A survey revealed that most people see Kuantan as lacking cultural and historical attractions, with no one mentioning its unique heritage sites. This shows a clear gap in awareness and the need to better promote and connect the community to Kuantan's rich history.

SOLUTIONS

By enhancing media exposure, the campaign positions Kuantan's hidden cultural and historical sites as must-visit destinations for Malaysians. The initiative highlights these unique attractions through engaging activities, including guided trails, immersive storytelling, and interactive experiences at local landmarks.

BIG IDEA

'Marilah Ke Rumah Kita'

Kuantan is more than a place — it's a feeling of home. From Pantai Batu Hitam to Menara Kuantan 188, Nanyang Mansion, The Royal Library, and Street Art Kuantan, this campaign connects people to Kuantan's hidden heritage through stories, art, and community.

CAMPAIGN OBJECTIVE

To celebrate and preserve Kuantan's cultural and historical heritage by creating a vibrant, immersive festival that brings people together through art, storytelling and community experiences.

AUDIO VISUAL TEASER

SOCIAL MEDIA

This festival needs social media to reach a wider audience, build excitement before and during the event, encourage real-time engagement, and create a digital archive of shared experiences through user-generated content and campaign hashtags.

ENVIRONMENTAL MEDIA

The environmental booth was chosen to create an engaging physical touchpoint that connects audiences to our website and social media through interactive experiences, encouraging content sharing and deeper storytelling across all platforms.

PHYSICAL IMC

They serve as tangible reminders of Rumah Kita, helping to increase brand visibility, spark curiosity, and reinforce the Rumah Kita message in everyday settings.

THROUGH THE LENS OF TIME SHAH ALAM'S STORY

Problem Statement: Shah Alam faces a problem of in their cultural backstory especially among the younger generation

Solution: Execute a targeted advertising campaign to highlight the cultural backstory of Shah Alam, Selangor which began with Orang Asli to today's modern interstate cultural blend.

Objective: Culturally curious young adults aged 18–30, aiming to reconnect them with Shah Alam's roots through nostalgic, interactive storytelling.

Target Audience: To revive cultural awareness and pride among Shah Alam's younger generation by showcasing the city's rich heritage through immersive and creative experiences.

City Council: Majlis Bandaraya Shah Alam (MBSA)

YOUR HAPPY SPACE PUTRAJAYA

YOUR HAPPY SPACE — PUTRAJAYA —

★ PROBLEM STATEMENT

Putrajaya is often seen as just an administrative hub, lacking vibrancy and community life. Many people perceive it as quiet and lifeless. This misconception hides the vibrant lifestyle, diverse cultural events, and entertainment opportunities that Putrajaya truly offers.

◆ SOLUTION

The campaign aim to reimagine Putrajaya as a vivid and vibrant city. Highlight Putrajaya is a city to live where every place inspires vivid and community lifestyle. Break stereotypes by showcasing its rich community life, cultural diversity, and recreational offerings.

◆ CAMPAIGN OBJECTIVE

To engage and attract local visitors and potential residents by showcasing Putrajaya as a lively and vivid city that offers a balanced and fulfilling urban lifestyle, positioning it not just as an administrative city.

● BIG IDEA

Position Putrajaya: Your Happy Space, a vivid and vibrant city where lively lifestyle meets natural beauty, creating the perfect balance for life, joy, and community.

ANIMATION

Unlocks > Living Lines

Where drawings breathe
and stories take life.

Captures the essence of animation – the spark that transforms still frames into living motion and emotions into narrative journeys. Here, illusion shapes emotion, and motion breathes life. Each sequence of frames resonates as an echo of narrative power, turning imagination into worlds that move us.

The Project Brief

This year's animation students projects delve into their own identity; from family values to good fun amongst friends, from reimagined folklore to futuristic worlds. Each animated work tells the story of tradition or innovation; transforming visual art into emotional journeys. Students explore storytelling, world building, and social bonds through animation styles and techniques. These final projects reflect the endless creativity and critical insight of our students, forming a vibrant collective from the eyes of the next generation, through beautiful handmade animations.

ABAH

A father, living in quiet solitude after a divorce, is reunited with his daughter in an unexpected visit. They relive moments from the old times over warm memories and a shared meal. As they laugh and cook together, something in her reaction begins to unsettle him. She hesitates, then refuses the food with a strange, distant look in her eyes. Something feels off, but he clings to the joy of the moment. As their quiet moment unfolds, something deeper stirs, revealing a truth too fragile to face.

PICNIC PALS

Unicorn named 'Candy' is disturbed her enjoyable picnic by Bird 'Zippy', they experience struggles but learn lessons.

Jikihara Marin
Taiyaki7.mjpony@gmail.com

ANIMATION | LIVING LINES

UNICORN (CANDY) DESIGN

Her hair is fluffy and messy with the bend and unique bands. Also fluffy enough to show clumsiness.

A cheerful unicorn who likes to eat food and sweets. She is positive and kind but clumsy and do stuffs at her own pace.

Her hooves are smaller to the tip and body is big and round.

The body proportion is based on this 2 heads body with big head, eyes, and ears. Hairs are simple big pieces.

She wears cute neck ribbon ties, and put plumeria flower on the head near to ear. Also she wears big and small ribbons on her hair.

Her horn is simpleicorn shape.

ENVIRONMENT DESIGN

SKETCHES

Part 1 color simple collected colors matches her personality & environment.
Part 2 body is cute but purple is blue element with her appearance when she happy.
Change 2, soft color make her feel but can calm when doesn't with in environment.
Part 3, change color make her feel but can calm when doesn't with in environment.
Part 4, change color make her feel but can calm when doesn't with in environment.
Part 5, change color make her feel but can calm when doesn't with in environment.

IT WAS DIFFICULT TO DESIGN CANDY DUE TO THERE'S POPULAR PONY ANIMATION: MY LITTLE PONY, THUS TRIED MANY SHAPES AND COLOR SO MAKE HER UNIQUE AND APPEALING

Ahmad Azlan
Supervisor

Muhammad Firdaus
Supervisor

The Project Brief

This collection of five VFX projects explores mystery, fantasy, horror, imagination, and action through cinematic storytelling. Bongkok Tiga blends folklore with chilling suspense, while Indina bridges memory and magical realism. Infectious captures visceral body horror, contrasting with Sangkara Putra's playful twist on superhero spectacle. Finally, VENDETTA delivers a high-stakes techno-thriller of corruption and vengeance. Together, these works showcase originality, strong visual execution, and dynamic emotional impact.

BONGKOK TIGA

The story follows Kamal, a detective determined to solve the mystery of his brother Aidil's disappearance. Reviewing Aidil's body camera footage, Kamal sees Aidil searching for a missing child in an abandoned building before encountering a mysterious black figure. Spotting something new in the footage, Kamal heads to the building and finds some of Aidil's belongings. During his investigation, Kamal encounters a similar black figure, which he assumes to be Aidil. However, Aidil morphs into a Nenek Kebayan, attacks Kamal, and he is unable to escape.

NENEK KEBAYAN

THE ANTAGONIST

Name : Nenek Kebayan
Age : 150+ years old

TRAITS

- Old and grimey
- Killer
- Ancient beast
- Supernatural

BACKSTORY

- In local folklore within the Malayan spectrum, Nenek Kebayan is an old lady who possesses mystical or supernatural powers.
- In this story, she resides in an abandoned building, luring children inside so she can eat them, and the ability to shapeshift.

Kain batik element to distinguish from other nenek, folk lores

Body stance of nenek, with a hunched back

Facial feature, crooked nose, baggy cheeks, thin lips, white eyes

INSPECTOR KAMAL

MAIN PROTAGONIST

Name : Kamal Rosli bin Mohd Su'ud
Age : 35 years old

TRAITS

- A family man
- Lone wolf
- Very critical in work
- Adventurous

BACKSTORY

- Inspector Kamal Rosli bin Mohd Su'ud, born and raised in Seri Desa. He is a husband to Fazura Aqilah and a father of three children. Kamal is also a brother to Aidil Hamdan.

His main goal is to find and bring back his brother, Aidil.

Smart casual with sports shoes

Gun belt to signify readiness in any situation

Body camera mount

VENDETA

Malaysia has embraced technological advancements with the rise of TUNAS Corp, a leading mechanical engineering company in Kuala Lumpur. Over the past decade, shifts in leadership have reshaped the company—but under former CEO Dato' Tengku Rafael, corruption thrived.

Rafael's latest scandal centers on the BDG Mark 1 prototype, a mechanical android project tied to a string of deaths—truths hidden from the public.

Maliq Rafiq, a retired vigilante gifted with superhuman abilities by his extraterrestrial ally Raka, is pulled back into action after his wife is murdered while exposing the conspiracy. Determined to topple the corrupt CEO, Maliq sets out to uncover TUNAS Corp's darkest secrets.

- Born and lives in a rich family.
- Likes to play a lot
- A determined boy with a hint of shyness
- Not used to thinking about other people's feelings but has a kind heart.

Environment Design

THE GOLDEN PRICE

A young man caught in a financial crisis encounters an entity that offers to help him overcome it. But little does he realize, seeking aid from the supernatural always carries a price.

DIPLOMA IN **CREATIVE AUDIO**

Unlocks > SonicEchoes

Where sound transform
and paints emotion

Embodies the power of audio to transform experience. From sound design to composition, each piece demonstrates how sound, rhythm, tone, and atmosphere narrate stories, amplify visuals, and leave reverberations that linger in memory.

The Project Brief

The final-year project is a 16-week collaboration between Diploma in Creative Audio and Diploma in 3D Modeling & Animation students, simulating real-world production. Animation students develop an animated short film, while audio students create complete sound design, including voiceovers, music, and effects. Both follow shared milestones and critiques, culminating in a 5.1 surround mix and final presentation to an industry panel, building technical, creative, and professional skills for future careers.

Dzulhafidz Dzulkifli
Programme Coordinator & Supervisor:

Industry Panel:

TILL DEATH UNDOES US

A story about Arman, who was engulfed in grief and loneliness haunted by hallucinations of his wife's presence. Desperate to escape his misery, he decides to perform an ancient ritual to bring her back to life.

Nazrul Fhad Sulaiman
Fahmi

CREATIVE AUDIO | SONICECHOES

MAGEWIRE

A story about a powerful battle maniac wizard travels across the world to a futuristic dystopian world and encounters a dedicated security robot.

Thoriq Mazlan

LAPAR

A story about starving young and poor boy, desperate for food. He stumbles upon a mysterious, abandoned hut in the forest, only to encounter a menacing creature who, after a violent clash over spilled stew, makes him a new meal.

Muhammad Shahiruldin

THE LION'S UNITY

In a small Malaysian town, two culturally diverse friends must set aside their differences and blend tradition with innovation to save both a struggling lion dance workshop and their friendship.

Mohammad Yohiet
Zihnie

Ammar Irham
Mohd Idwan Shah

In a world where robots chase dreams, a shy arm designer finds unexpected inspiration in a charming barista, but when tragedy strikes, he must choose between his ambition and a selfless act of love that could change both their lives forever.

HEARTWARE

Izzat Mohd Azlan

Driven by loyalty, a boy ventures into the forest to find his lost friend but instead encounters a legendary beast. Just as he readies his strike, the sight of a familiar bracelet forces him to face a heartbreaking truth.

AWAS MAWAS

Jassven Vignesvaran

Jasveinna Thilagarajan

CANDY RUSH

This story unfolds in a vibrant candy-coated world, where two adventurous kids chase a rare gummy bear. Their chase sparks a whimsical journey filled with wonder, chaos, and unexpected discoveries.

FOUNDATION IN

CREATIVE MULTIMEDIA

Unlocks > Visual Root

Where ideas nurtured
and exploration begins

Highlights the foundation of creative discovery – a space to experiment, learn, and grow across disciplines. These early works capture the raw energy of ideas in motion, the curiosity that fuels creativity, and the beginnings of every future journey.

The Project Brief

The Foundation of Creative Multimedia final project highlights two explorations: photography and sculpture. Photography showcases creativity and technical skill through portraiture and product shoots, applying composition, lighting, and storytelling techniques. Sculpture addresses marine life and environmental issues with symbolic materials, celebrating ocean beauty while confronting pollution and poaching. Together, these works position visual ideas through artistic exploration and advocacy, reflecting creativity, collaboration, and social awareness.

Mixed Media:
Wires, yarns, papers etc.

Type:
Relief/Wall Hanging.

EMBRACING

The subject of our design is an underwater scape with the subject matter being the following: Turtle (main subject), corals, seagrass, and jellyfish. The design will be incorporated into a relief sculpture on the wall. The materials used will be aluminium foil for the turtle's parts and the tips of the corals, wires and yarns for the grass, paper (potentially holographic) for the shell, paints for the colouring of the subjects and cardboard as the base of the sculpture. The message content our group wants to deliver to the people is the beauty of turtles in their environment and how they are considered endangered. We want to emphasise how turtles contribute to Mother Nature's beauty and how destroying their environments and poaching them are illegal practices that should not be encouraged. Turtles are animals that belong on Earth and so we want to form a sculpture that encourages the freedom of turtles from illicit activities.

NATURE

The combination of the fish and plastic bottle represents how humans can impact the ecosystem in a bad way. Where does it start? And where does it end?. It begs the question, what happens if nature adapts to pollution instead of us fixing it? It becomes a warning. The fusion of the two also shows symbolism on how bad the pollution can be and how it affects marine life and population. This can reflect in our daily lives. How we throw away our trash into the ocean. The trash won't disappear but it will end up in someone else's home and possibly kill them.

Mixed Media:
Plastic Bottle, Cardboard,
Paper Mache,
Newspaper, Masking Tape.

Type:
Relief/Wall Hanging.

Mixed Media:
Wires, Papers, Vinyl Film,
Paper Mache, Paints etc.

Type:
3D/Pedestel

Our sculpture shows the dynamic relationship between sea creatures living under the ocean. This design focuses on the octopus that placed in the center, clinging to the seaweeds at the back and 3 seashells at the bottom. The octopus tentacles are holding and swaying with the seaweeds to show underwater movement that symbolizes harmony and adaptability of the ecosystem. The seaweeds made out of green holographic vinyl film to recreate the seaweed's flowiness. At the base, the seashells represent the natural seabed and the different sizes tell the variety types of seashells that exist in the sea. The seashells emphasize the lines and curves that we have crafted using clay to highlight the beauty and complexity of ocean life.

EMBRACING NATURE

Other than that, the color scheme that we have chosen is split complementary that consists of yellow-orange at the seabed, yellow-green at the seaweed, and purple at the octopus. This color scheme allows the subject in the center to stand out while altogether still look harmonious. Therefore, our sculpture lets audiences to appreciate marine biodiversity while promoting awareness about ocean life through one of imaginative underwater scenes.

The sculpture raises awareness about illegal animal poaching. Humans often use crocodile skin to make fashion items such as shoes and bags. The zipper on the crocodile is a metaphor that conveys the idea of animals being objectified. Additionally, the rope tangled from the back to the tail of the crocodile represents the restrictions and violence humans impose on animals. The spikes at the end of the rope symbolize the act of killing. The sculpture also promotes environmental protection by discouraging the use of animal leather for luxury goods. We used paper, cardboard, iron wire, yarn, egg cartons, foam sticks, acrylic paint, and white glue as our materials. First, we built the framework of the crocodile using iron wire. Then, we used paper to form the body and egg cartons to create the scutes (the bumpy structures on its back). We painted the entire crocodile with acrylic paint. The zipper was made from small pieces of cardboard, which we cut and painted. The tangled rope was made by twisting and braiding yarn together. For the exposed bones, we bent iron wire into bone shapes and wrapped them with thin foam sticks.

Mixed Media:
paper, cardboard, iron wire,
yarn, egg cartons, foam sticks,
acrylic paint, and white glue.

Type:
